# imgZine

# IMGZINE IS LOOKING FOR A C++ DEVELOPER!

imgZine is a fast growing, innovative startup that uses the latest (and greatest) technologies with its headquearters in Amsterdam. We're looking for a developer who is willing to work in our new office in Heraklion, Greece.

## C++ DEVELOPER / FULLTIME

- Design and develop code in C++. You will work on a subset of the following:
    - the core machine learning algorithm
    - high performance computing
    - distributed computing
    - database management
    - web-based features such as http protocol and fastcgi
- Collaborate to solve complex architectural problems.
- Perform design and code reviews.
- Take initiative and responsibilities in projects.

## REQUIREMENTS

- Hands-on programming experience
- Ability to work in a Self-Directed environment.
- Experience with Linux (we work with Centos).
- Interested in distributed computing and/or large scale systems.
- You have a knack for high performance computing and ultra-low latency.
- Expertise in object-oriented languages

## BONUS

- Knowledge of real-time bidding and SSP's.
- Experience with or understanding of web servers (e.g. Tomcat), server-side development, performance tuning and debugging techniques, HTTP request/response structures and lifecycle, Python, multi-threading, JSON, etc.
- Understanding of artificial intelligence
- Background in mathematics

If you meet the above criteria then we would love to hear from you.
